Automatic Pressure Controller & Float Switch

www.prakashpump.com

Applications

- Household Water Consumption
- Commercial Water Consumption
- Garden Water Consumption.

Pump Controller is more energy saving, more intelligent and more humanized.

It is run the pump safe and more environment friendly, Pump controller improve the imbalance of water conservancy, extend water pump service life, make the most use of water resource.

Products Advantages:

Dynamic Shape:

Streamlined design with intelligent technology it gives Dynamic Shape.

Delay Startup:

The pressure controller delays to start 3 seconds after the current is switched on to protect the pump and personal safety.

Dry running protection:

After 3-5 seconds usages without water. the controller will cutoff current source automatically.

Automatic restart:

Circulate by time, automatically restart to test water flow until water supply going stable.

Stop water supply and stop the pump:

When stopping water supply, the intelligent control system will inspect automatically and control the pump to slow down and stop operating

Flow Control:

When the outlet water flow becomes slow, the intelligent control system will inspect automatically and switch to small flow control system to guarantee normal use of the water pump, which infinitely extends the life span of the controller and automatically realize the barrier free operation of water pump.

Overload Protection:

The intelligent system is equipped with heat overload protector to prevent water pump being overheated and damages under abnormal use.

Prakash Pressure Controller

PAPC - 1

Rated voltage	220-240v
Frequency	60Hz
Maximum current	10A / 20A / 30A
Maximum power	1.1 KW / 1.5 KW / 2.2KW
Starting pressure setting	1.5 bar / 1.0 - 2.5 bar
Maximum working pressure	10 bar
Connection thread	inlet male thread G1" outlet male thread G1"
Protection rating	IP65
Maximum operating temperature	60 °C
Cable length	cable 25cm for power & 40cm for motor

PAPC - 3

Rated voltage	220-240v
Frequency	60Hz
Maximum current	10A / 20A / 30A
Maximum power	1.1 KW / 1.5 KW / 2.2KW
Starting pressure setting	1.5 - 2.5 bar / 1.0 - 2.5 / 1.0 - 3.5 bar
Maximum working pressure	10 bar
Connection thread	inlet male thread G1" outlet male thread G1"
Protection rating	IP65
Maximum operating temperature	60 °C
Cable length	cable 25cm for power & 40cm for motor

Automatic Pressure Controller & Float Switch

PRAKASH

Prakash Pressure Controller

PAAC-2A

Rated voltage	220-240v
Frequency	60Hz
Maximum current	30A
Maximum power	2.2KW
Starting pressure setting	1.0 - 3.5 bar
Maximum working pressure	10 bar
Connection thread	inlet male thread G2" outlet male thread G2"
Protection rating	IP65
Maximum operating temperature	60 °C
Cable length	cable 25cm for power & 40cm for motor

Prakash Float Switch

PFS-2 / PFS-3

Rated voltage	220-240v
Frequency	60Hz
Maximum current	10 (4)A / 16 (4)A / 20 (4)A
Protection rating	IP68
Maximum operating temperature	55-60 °C
Color	Black
Cable length	2 meter / 3 meter

Illustration For Counterweight Installation:

Peel the plastic ring off the counterweight before installation and set the ring around the cable, then insert and fix it with moderate pressure at the fixing end.

Description

Auto- fill-water modes

Auto-grainage-and-lack-water protection modes

Fill-water and drainage auto-switch modes

connect the control's blue line to electric pump, black line is connected to zero line, black, brown line can not be connected and should be insulated.

connect the control's brown line to electric pump, the black line is connected to zero line, the blue line can not be connected and should be insulated.

the chart is fill-water and drainage auto-switch mode, this electric connection chart synthesizes by automatic fill water and auto-drainage.
